## UV Resistant Resin Bound Stone Carpet System

X-Calibur ResinTex is a system of laying a hard wearing course of mixed resin and dried aggregates onto either a new or existing ash ford or concrete base. Resin Bound is formed by mixing dried aggregates with a high performance resin mixture. The mixture is trowelled and polished to give a uniform flat finish.

The ResinTex long lasting range of resin bound gravels and aggregates offers a superb choice of 30 stunning colour blends. Each color blend is made up of different aggregate sizes and textures and colours span the spectrum - from the richest reds to stylish greys to soft and subtle golden browns.

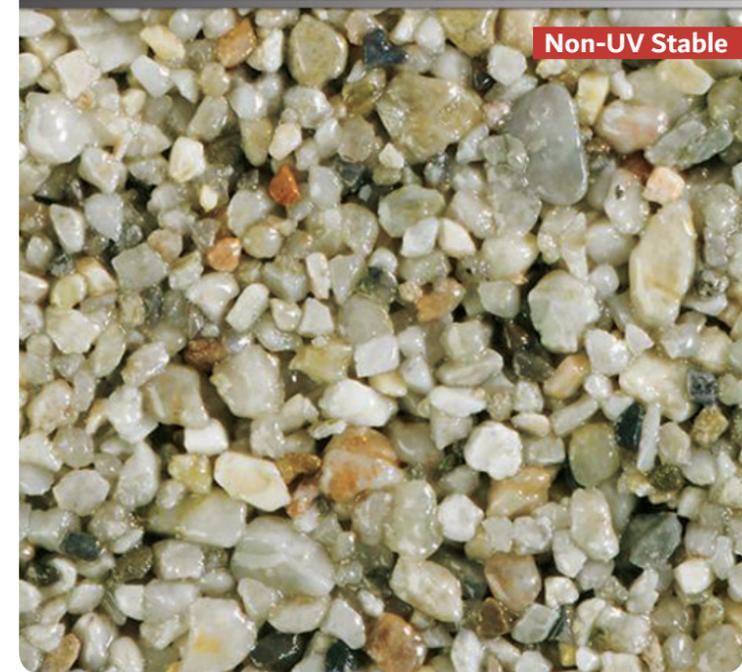

The system is so adaptable you can create any shape imaginable on the surface. Blends of colours and beading allow you to use two colours side by side, enabling superb design options.

ResinTex uses an aliphatic PU binder. Prominent exceptional UV resistance.

Example of colour change in less than 2 weeks. The photo demonstrates how much the surface has faded.

ResinTex uses kiln dried washed aggregate.

- High Strength
- Permeable
- Easy to Clean
- UV Stable
- Resilient
- Crack Free
- Easy to Trowel
- Seamless
- Weed Resistant
- Slip Resistant
- Low Maintenance
- Flexible

### Where Can I Use ResinTex?

- Driveways
- Swimming Pools
- Paths
- Patios
- Parks and Gardens
- Concourses
- Car Parks
- Cycle Paths
- Race Courses and Sports Stadium
- Picnic Areas
- Towpaths
- Schools
- Medical Centers and Hospitals
- Terraces
- Bridges
- Shopping Centers
